Johnson Controls Intelligent Network Controllers

## FX 03 Controller

The controller is designed specifically to provide direct digital control of terminal unit applications with heating and/or cooling coils, an electric heater and a three-speed or variable speed fan. The device can be configured by the installer without the need of a PC and software tool, using a set of on-board dip-switches. The controller is designed for mounting by York OEM equipment FCU manufacturers on DIN-rail or directly on to the FCU surface.

## Communication Options

The FX03 terminal unit controller provides N2 Open and BACnet@MS/TP communication options that are field selectable via dip-switch for connection to a supervisory network.

## Valve Package

JCI VG6000 range of valves with kits can be fitted and ordered from the factory.
